

Department of Infrastructure, Energy and Resources TASMANIAN INFRASTRUCTURE STRATEGY MODEL

Tasmanian Infrastructure Strategy Focus Areas

Aspirational and long-term visions - expression of desired government outcomes through policies

Overarching Government Policies to drive infrastructure policies and planning

Outcome-based infrastructure policies to define government infrastructure outcomes and facilitate efficient planning responses.

Analysis-based strategies to address emerging challenges consistent with government policy.

Review of efficiency of proposed strategies and plans in addressing government policy outcomes.

Consolidated State Infrastructure Sector Plans with clear links to government policies, strategies and private sector plans (including government-owned businesses).

Evidenced-based investment decisions.

Regional land use planning to both implement and inform State Infrastructure Plans.

Extension of current land use planning reforms to address long-term infrastructure planning needs.

Efficiency of the delivery of publicly owned infrastructure.
